COUNCIL.

A Session Brimfull of Business.

Private Enterprise to Sewer the City.

Mr. Daly Representing a Wealthy Syndicate.

First Street to Be Cut Through the Hill-The West System Laid Over-The Utah Line Wants a Franchise-Bapid Transit Vetoed. The City Council met in regular session

resterday morning. Present, all the mem-pers except Messrs. Sinsabaugh and Teed. The minutes of the last meeting were read by Deputy Clerk Dantorth and approved by the board.

by the board.

At the request of Mr. Hanley a petition
was read asking for a change in the grade
of Hansen street, north of Patrick street, as the present grade is ruinous to the property.

Mr. Hanley moved that a resolution of in-

tention be published in accordance with the petition

Mr. Cohn objected, that the resolution of intention as originally passed had not been opposed. Now, when the work is half done, they object, and the city will be put to additional expense.

Mr. Hanley said that the property-holders on the street all wanted the work done this way, and they should have their wish. They would, if necessary, pay the additional expense themselves, but the city never pays out a dollar for the needs of East Los Angeles.

MR. COHN PROTESTED. He did not want any such statements going out through the press. The city had spent \$5000 last month in East Los Angeles,

spent \$5000 last month in East Los Angeles, and \$2000 on Griffin avenue alone. They had spent no less than \$70,000 on that portion of the city in the past year.

Judge Page addressed the board on behalf of the property-owners. He said that the grades on Hansen street had been laid down erroneously, and a fill had been made on top of the hill. The street was now dup and impassable. The contractor was at work on it, and he and the property-owners were willing to make a change in the grade if it sould be done legally.

Mr. Cohn moved to refer the whole basiness to the property-owners and the contractors and let them fix it to suit themselves.

On motion they were instructed to do so under the superintendence of the City Sur-

veyor. PIPE-LAYING IN SIXTH STREET. Mr. Bosbyshell asked if the bids were in for laying the pipe line down Sixth street from Toberman's reservoir to the Sixth street Park. He thought action should be

street Park. He thought action should be taken immediately that the street might be paved.

Only one bid was offered, and it was opened and read. It was from G. N. Perrine, and offered to do the work for 65 cents per lineal foot.

Mr. Collins said that Lacy & Ward had telephoned up that they wanted to bid. He asked that the matter be held open till they could be heard from.

Objections were made by other members that, now the bid had been opened, it would be unfair to admit other competitors.

Mr. Cohn moved that the bid be rejected. He said that the price was 20 cents more than the work could be done for. It made a difference of \$600 in the cost of the pipe.

The bid was accased and Mr. Perrine's foreman went off to ret his bond.

Mr. Lovell presented a petition from property-holders on Nevada street, between Ninth and Tenth streets, asking leave to grade the street in front of their property, and asking that the City Surveyor establish the grades. The petition was allowed.

STORM-WATER DRAINS.

Mr. Hanley moved that the City Surveyor be instructed to prepare a system of stormwater drains for East Los Angeles. Mr. Chandler said the same need existed

Mr. Chandler said the same need existed for Boyle Heights, and moved to amend to include that section
Mr. Cohn argued that these things cost money, and they could not be done. If would take a million dollars to construct storm-water drains throughout the city. Now, after the debts are paid, there is just \$39.000 left for street purposes to last till next October. Left them take that money and spend it as they pleased, and then shut up the City Surveyor's and Street Superintenden's offices, which were costing \$5000 each per month. If people wanted these costly improvements why did not they come up and say so before the Board of Equalization.

Equalization.

Mr. Barrett moved that the Street Superintendent be instructed to build culverts at
Virginia avenue and Johnson street, at
Aliso avenue and Cummings street, and to
make a ditch to drain Kuhrts street. Also
that hereafter he be instructed to place
pipes across streets for drainage purposes
whenever those streets are to be paved.

A LENGTHY DISCUSSION

A LENGTHY DISCUSSION ensued on this motion, and it was lost. It was then reconsidered, on motion of Mr. Hanley, and divided into sections. The section calling for culverts at Virginia avenue and Alise avenue and to drain Kuhrts street was carried, Mr. Cohn alone voting

In the debate on the latter part of the motion, Mr. Chandier stated that the Super-intendent of Streets had men at work enlarging the culvert on First street where the cable company had reduced its size to accommodate their track. He thought the bill for that work should be footed by the railroad company.

railroad company.

Mr. Book said the capacity of the culvert had been reduced four to one. He thought it should be restored to its former condition. it should be restored to its former condition.

Mr. Cohn thought the blame rested entirely on the City Surveyor. The cable company was oblived to put in their track according to his lines and grades, and if they were not right it was his fault.

Mr. Lambie explained that he knew that was so, but the company did things to suit themselves. They put their curves and tracks where they pleased and he could not help it.

Mr. Cohn said that their franchise compels them to act under the instructions of the City Engineer, and he should see that they did so.

Mr. Chandler said that if we went on in this way with the scale-bugs eating up our orchards and the factories being driven out of town, we might as well shut up shop.

Mr. Hiller stated that new erdinances were being drawn to cover these cases and give manufacturers greater freedom from these annoyances. He moved that the petition be granted. It was so ordered.

A MESSAGE FROM THE MAYOR

A MESSAGE FROM THE MAYOR

was then read:

I return herewith, without my signature, the ordinance granting to the San Gabriei Valley Rapid-transit Railway Company a franchise fyr the construction of a railroad in the city of Los Angeles, for the reason that I consider that the ordinance does not sufficiently restrict the company from switching in the public streets, and also sufficiently over and along Rio avenue to First street, there is no provision whatever as to what grade will be used by the railroad company on these streets, and I do not believe the city's interest has been sufficiently looked after.

A route could be easily selected which would go under Macy and Aliso streets and Summit avenue and thence to First street by the use of a short underground tunnel, which would do away entirely with the laying of tracks on the aurtace of the streets. I shall have no objection in approving an ordinance in which the city is fully protected from all damages by the granting of a railroad franchise, and as I understand the company is ready to go to work at eace, I would suggest that you appoint a committee of there from your body to act with me to confer with Manager Monroe and have these points alluded to incorporated in the franchise, I also inclose a protest from prowerty-owners interested in the matter. W. H. WORKMAN, Mayor.

Afternoon Session.
The Council reconvened at 1:30 p.m., the same members being present as in the morning. The Mayor's message was taken up again, and after an informal discussion, a motion was made by Mr. Cohn to rescind the previous action taken by the Council in regard to the franchise of the Brapid Transit road. The motion was carried and the message then referred to the special committee.

The City Attorney reported as follows in regard to an action for damages begun by J. K. Murray:

In the matter of the blasting by the Los Angeles Construction Company, I would report that the bond in question was taken by the city for the benefit of any citizen who might be damaged, and any action for damages should be brought by the party injured.

the months of September and October was presented and referred to the Finance Committee.

Mr. Cohn moved that the Clerk notify the board to make their annual report as required by the charter. Carried.

Mr. Lovell said that the question had been often raised as to paying the street before schoolhouses, whether it should come from the school fund or be done by the city.

Mr. Cohn said it was certainly the place of the school board to pay for paying and sewer assessments on all preperty under its control. The matter was then dropped.

The Board of Health reported that the expense of running the

SMALLPOX HOSPITAL had been \$16,000 in 1886 and \$12,000 in 1897. had been \$16,000 in 1896 and \$12,000 in 1897.

Of the patients, a large number had been from the county outside the city. The report recommended that the Board of Supervisors be requested to pay \$10,000 for their share, and that hereafter the Health Officer receive no patients from the county till proper provision had been made for their support.

The recommendation was unanimously adouted.

The recommendation adopted.

Mr. Collins moved that the Superintendent of Streets be instructed to put in temporary storm-drains at Olive and Sixth streets and at Hill and Sixth streets, across the latter. He said they would not cost much, and would answer till the permanent system should be adopted.

The citizens living there offer to lay the pipe if the city will furnish it. It will take about 200 feet of 30-inch pipe, and can be utilized as a part of the permanent system.

Mr. Loveli moved to refer to the Board of Public Works and the City Surveyor.

Mr. Collins moved that the proposition be accepted, and the work be done under the superintendence of the City Surveyor.

superintendence of the City Surveyor.

The Surveyor said it would take 600 feet of pipe.

WHO IS TO BLAME?

Mr. Humphreys said the city was liable for damages in cases of this kind when they had graded new streets and backed water into private property.

Mr. Cohn wanted to remove that misunderstanding, that the city was liable for this kind of thing. The grading of the streets was not done by the city, but by the property-owners, and if they made banks without culverts, thus forming ponds, it was their place to repair the damage. He instanced the case of the culvert in the Arroyo de los Reyes, which had cost the city \$15,000 and was utterly useless.

Mr. Book said that this was not pertinent to the case. All that was needed was \$200 or \$300 to put in a little pipe-line and relieve the ursent demand of these people.

Mr. Donegan then addressed the board on the subject, and said the whole difficulty was due to bad engineering.

Capt. Barrett opposed putting in any little pieceineal of pipe there to carry off the water onto the next man's lot and raise more trouble. The only way to do was to spend \$4000 and carry the water down to the 42-linch drain on Beaudry street and supply that section with a permanent drainage system for all time to come. This plan had been often brought up, and should be adopted.

The subject was referred to the City Surveyor to report upon.

The reports of the Sewer Committee for the past two weeks were read and their recommendations were adopted.

A MAMMOTH ENTERPRISE. City Attorney Daly then presented a com-nunication, which the Clerk read, as fol-

To the City Council of Los Angeles: I think it is beyond question that no other city of the United States claiming a like position in population, wealth and intelligence, can be found in a like sanitary condition to Los Angeles city. Without pansing to descant on the causes leading to this condition, but, recognizing the fact that the financial interests and sanitary welfare of this entire community demand that im-

mediate and effective action be taken in the direction of furnishing this city with a complete system of sewerage, consistent with sanitary laws and scientific appliances. And with this object in view, I will lay before your honorable body a proposition to be governed by the ordinary rules of business and the laws of the State of California, the city to know just what it shall receive, as shown upon maps and profile, and what it shall pay for it when received:

First—A good and sufficient bond shall be given to the city in any required sum, conditional for the faithful performance of any contract that may be entered into.

Second—All of the Council proceedings and record entries of the Clerk and Superintendent of Streets shall be approved by the undersigned.

Third—The City Council shall pass and

Third—The City Council shall pass, and

intendent of Streets Shall be approved by the undersigned.

Third—The City Council shall pass, and the Mayor approve, all ordinances and resolutions required by the laws of, the State to give validity to the proceedings and the final contracts and such forther ordinances and resolutions as may be necessary for the introduction and enforcement of an approved sanitary system of sewage.

Fourth—I will have furnished all the materials and labor required in the construction of the entire sewage system of the city, according to the Eaton plans, or such other plans as the Council may adopt; all the material to be of the highest grade (the Akron pipe now in the city yard to be used and the city allowed the same price as allowed in the construction of the system for the same pipe). All lateral sewers to be assessed upon all lands affected or benefited thereby, as by the general law provided; but said assessment shall not be paid until the property assessed is reached in the construction and completion of the swers in the assessment section of the work, within which the property assessed is stated. The price to be paid to be determined by the Council and other party, and fixed as a maximum price or sum per linear foot, within each assessment district. Work to be commenced five days after signing of contract, and vigorously prosecuted to completion. To commence deliverty of sewage of the central sewage district at the south boundary of the city within 90 days after signing of contract, and vigorously prosecuted to complete and paid for, shall be turned over to the city of Los Angeles free; and discharged from all debts, liabilities or obligations for material or labor.

Fifth—I will have constructed and completed an outfall sewer from the south

liabilities of obligations for material or labor.

Fifth—I will have constructed and completed an outfall sewer from the south boundary of the city to the Pacific Ocean according to any plans and specifications adopted by the council, said sewer to be paid for by bonds of the city, or in gold coin, or both, or by assessment upon all the lands, lots, etc., (linear assessment) as provided by law, bonds to be payable in 10 years if desired; the price to be paid to be determined by the Council and other party contracting.

Sixth—Or will construct the necessary outfall sewer lines required for the most approved sewer farm, furnishing land, or city to furnish land, specifications to be adopted by Council, and price to be determined by contracting parties.

by Council, and price to be determined by contracting parties.

Should this proposal meet with the approval of your honorable body, I will devote myself at once in the direction to furnish this community with the most perfect sanitary system of sewage that may be had. Respectfully,

MR. DALLY MADE AN ADDRESS defining his position. He said he expected to leave his office at the end of the year, and would devote his time to this scheme. The business had been taken up by capitalists of this city, and they had concluded that they could build the sewer themselves. Any amount of capital could be forthcom-ing, and the work could be done at once

ing and the work could be done at once and have it over.

He would guarantee, if the West system was adopted by the board, to begin at the south end and have a part of the sewer system running within 90 days after its commencement. Or if the Council wanted an outfall sewer to the ocean, they would put in one in first-class shape and have the best resources of science at its outlet, not on the beach but below the water.

Or if they wanted a sewer farm the company would run pipes to it or provide the farm itself if required, and if it proved a failure they would then run the sewage to the sea.

Everything must be done according to

ne sea.

Everything must be done according to w, however, and he for his company ould pass on the validity of all assessments or ordinances.

The cost of the work would be assessed on the various districts benefited, according to the requirements of law. The cost of the main and intercepting sewers would be distributed over such large areas that their cost would be but eight or nine cents a foot on the property assessed, this to be added to the direct assessment when the sewers are connected with the property.

This project is the result of mature deliberation. Citizens of means have thought ti time to act. They will advance the capital, do the work and collect their money by assessments afterward. They have been going over the matter thoroughly, and are ready to start in a tone and do up the sewage system in first-class style.

Mr. Lovell moved to refer the matter to the Sewer Committee.

Mr. Lovell moved to refer the matter to
the Sewer Committee.
Mr. Barrett wished to except the outfall
business, as that was in conflict with the
West system, now under discussion.
Mr. Lovell agreed with him, and the subject, exclusive of the outfall, was unanimously referred to the Sewer Committee.
Mr. Chandler moved that the

SOUTH SIDE IRRIGATING COMPANY

be requested to surrender their existing contract to the city. He thought the city should be off with one contract before getting on with a new one.
Mr. Maxwell of the Pacific Sewage Com-

pany stated that they had been making arrangements with the South Side Company, and would be able to arrange their contract satisfactorily.

Mr. Conn supported Mr. Chandler's motion.

Mr. Daly said the South Side Irrigating Company were anxious to surrender their contract. He suggested that the company be requested to meet and confer with a committee of the board.

Mr. Barrett moved that the matter be referred to the Sewer. Committee. Carried.

the City Hall. He thought Mr. Humphreys should specify his objections.

Mr. Humphreys would not state specific objections, but thought it a disgrace to the city. It is a box with a tin roof on it. He would have nothing to do with it.

The bond of G. M. Penne of \$500 for laying six-inch water pipe in Sixth street; was accepted, and the Mayor directed to say the contract.

The bids for a storm-water drain on Fifth street, between Hill street and Zanja No. 4, were opened, and the only bid was found to be that of Frick Bros., for 22-inch flat-base cement pipe at 66 cents per lineal foot, with excavation at 45 cents per yard, and catch-basins at 24 each, exclusive of 1ron work. The contract was so awarded.

quested to inform the board why he had not signed the warrant as passed by the board. Mr. Cohn explained it was some disagreement about the stable not being large enough. The motion was carried.

The matter of the Ninth-street bridge came up again, with the proposed change in that street through Mr. Wicke's property. Mr. Paly wearily explained once more that if this new line was adopted, all those assessed for the old could come back on the city for their money. After a long and lively discussion, in which Mr. Cohn hinted that members of the Council were interested in the change, action was deferred for one week.

The question of fixing licenses of shooting galieries at \$5 per month again came up and was this time passed unanimously.

A resolution for widening and improving on East Pico street, was read.

Mr. Barrett explained that this would open the street from Eleventh to Pico. The resolution was passed.

On motion of Mr. Lovell, a resolution was adopted opening up Los Angeles street between Seventh and Eleventh streets.

Mr. Barrett moved that the City Attorney be requested to take condemnatory proceedings to widen First street between Alameda and Center streets to 89 feet. Carried.

Mr. Hiller said that he understood that an ordinance had been passed some time ago regulating the

Mr. Humphreys explained that the number had been kept down to the maximum of 230.

Mr. Chandler stated that a resolution had been passed some time ago that no more new licenses be granted. He thought that now there were 240 saloons instead of 230.

Mr. Collins sustained the saloon point of view. He said there were no saloon keepers who were making money now, and what

now there were 240 saloous instead of 220.

Mr. Collins sustained the saloou point of view. He said there were no saloou-keepers who were making money now, and what was made was kept in the city.

Mr. Chandler moved that the City Clerk be instructed to destroy the 16 new licenses in his possession.

Mr. Cohn moved to defer all action till the new board is elected. Lost by the following vote: Yeas—Barrett, Collins, Cohn, Gibbs, Hanley, Moriarity—6. Nays—Bosbyshell, Book, Chandler, Lovell, Hiller, Humphreys, Mathews—7.

Mr. Hiller moved that the Police Commissioners be interrogated as to their action in granting more licenses than authorized by the Council.

Mr. Barrett moved as a substitute that the Police Commissioners be interrogated as to their action in granting more licenses than authorized by the Council.

Mr. Barrett moved as a substitute that the Police Commissioners be instructed to grant no more licenses. Carried.

The City Surveyor presented a communication stating that Mr. Stone of the San Francisco Bridge Company, now engaged in putting up the Seventh-street bridge, is insubordinate, and will not do as he is told. He asked that he be removed.

Mr. Barrett moved that the Clerk be requested to notify the company to remove Mr. Stone at once, and that all work on the bridge be stopped till this be done. Carried unanimously.

LOCAL POLITICS.

MUNICIPAL CANDIDATES BEGIN TO THICKEN.

Many Combinations Working for Their Fayorites—The Clubs Begin to Take a Hand-Republican Cau-cuses Called for Tonight and Tomorrow Night.

Local politicians are beginning to warm up over the city campaign. There are eight or ten good men who wish to occupy the chair of the chief executive of the city. Every political club in the city has pushed forward a candidate, and each one of them is confident of the success of its candidate. A strong contingent of the Oro Fino Club is out in force working for Walter S. Moore. Moore is their president, and they claim that, in consideration of the work done by them during the late campaign, they should that, in consideration of the work done by them during the late campaign, they should receive some recognition at the hands of the party locally. They are working tooth and toenail, and claim that their favorite will

ecure the nomination.

Numerous friends of all shades of Republicanism are urging a strong man in the person of L. E. Mosher. Members of the Union League are very active in his behalf, and they claim that Mr. Mosher has the inside track, and will go into the convention with votes eneugh to elect him on the first ballot.

side track, and will go into the convention with votes eneugh to elect him on the first ballot.

D. E. Miles has decided definitely to become a candidate before the convention for Mayor, and his friends are at work for him. A report was put in circulation last evening that the leaders of the citizens' reform movement had expressed a preference for Miles, and intimated that if the Republicans nominate him they will not only indorse him, but will get out and work for him with all their might. The report could not be verified, however, and it is believed that it is simply a trick of a smooth "polittion" with a judicially assessed character and his ward strikers, and that the reformers will be only too glad to support any good Republican who may be put up and who will subscribe to the declaration of principles which they have promulgated.

The friends of Judge W. F. Fitzgerald and Gen. John Mansfield are still working for them, although both of the gentlemen have declared that they are not in the field.

The fight for the City Attorneyship promises to be quite lively. William E. Dunn, Mr. Daly's assistant, and Charles McFarland of the Union League, seem to be in the lead. Mr. McFarland is a young man with a good record, and has had a good deal of experience in the same office in Ohio. He has resided in the city over three years, and has made a great many friends. F. R. Willis has many friends working in his interest for the same office in Ohio. He has resided in the city over three years, and has made a great many friends. F. R. Prof. J.* M. Guinn, a veteran in the Republican ranks of Los Angeles, and a man of business capacity and experience, is also a candidate for this office. He entertains conservative views upon the subject of values, and would acceptably perform the duties of the place.

M. D. Johnson is the prominent candidate for City Treasurer.

Col. M. K. Vernon and Len J. Thompson, both well-known citizens and cleanhanded men, are out for Tax Collector.

The board did advertise for bids, and several iron firms in this city sent men down to figure on the contract. Among the bidders was the Baker Ironworks. This firm sent a man down, and kept him there at a cost of \$150.

When the day came for opening the bids it was found that the contract had already been let, and that \$15,000 worth of material had been laid down on the ground. On investigation, Baker & Co. found that the material had been purchased in the East by an engineer named Coates and shipped out in the name of one of the trustees.

The citizens are thoroughly aroused on the subject and will employ an attorney to investigate the matter.

He is to executate and brick up the reservoir 25 feet in diameter and 25 feet deep, surrounding the same with a substantial brick wall five feet high. The distance the pipe is to be laid, as provided in the contract, is about one mile.

Now, as all these incidentals, if we may be so allowed to style them, are to be provided for out of the \$18,500 above cited, where does the \$15,000 for the pipe come in Mr. Coates is to take his pay in our water bonds at par, which is of itself quite an item to us.

bonds at par, which is of itself quite an item to us.

He is to give a good and sufficient bond for the faithful performance of his work, and I am confident that our trustees will so far protect our interests that we need have no fears upon this score.

It has been claimed by some of the "disgruntled" that the contract had been promised to Mr. Coates, previous to his departure for the East.

Allowing, for argument, that the trustees had given Mr. C. every encouragement to believe that his bid would be accepted, yet

it is hard for us to understand how they could promise it to him out and out, since it was to be given to the lowest bidder, which could be only determined at the opening of the sealed bids in open session of the boat hard.

opening of the scaled with higher seasons of the board.

Wifile we do not believe our trustees to be exactly immaculate, "sans reproach," or anything of the kind, yet we do honestly believe them to be actuated with the best of motives for the welfare of our city, and who, believing they are right, will go straight ahead in the performance of their work.

straight ahead in the period many others, is not exempt from a class of cranks, who, while posing as would-be saviors of their fellow man, are yet fulfilling a dog-in-the-manger policy, which can only prove disastrous to any place unfortunate enough to be blessed (?) with them.

That their number, or their influence, at any rate, will prove radically less from this time on, is the prayer of TAXPAYER.

A QUEER AFFAIR.

Mr. Yonkey as Chaperone to a Young Girl. Yesterday morning between 3 and 4 o'clock Officers Dillon and Dorsey brought

to the police station a man who gave the name of Ernest Yonkey, a stone mason by name of Ernest Yonkey, a stone mason by trade, and a young girl, aged 14 years, who said that her name was Bertha Smith, and that she resided with her parents on San Pedro-street, near Santa Fé avenue. The officers noticed the man and girl going to the Stevenson House at a late and unusual hour, and, thinking from their actions that something was weare, want to the held.

the Stevenson House at a late and unusual hour, and, thinking from their actions that something was wrong, went to the hotel and made inquiries about the case. The clerk said that he knew nothing about them beyond the fact that the man had engaged a room, and that the two were occupying it. The officers them told him of their suspicions, and demanded that they be shown up to the room, which was done by the clerk, and the two were found in the room, but occupying different beds. Both the man and the girl insisted that they had done nothing wrong, but the case looked so bad that they were locked up until 8 o'clock, when Mrs. Watson was sent for, and, after a consultation with Chief Benedict, the girl was sent home to her mother and Yonkey was discharged.

The girl tells a rather singular story. She says that Yonkey is an old acquaintance of her family, and that she formerly knew him in Milwaukee, before coming to Los Angeles. She says that on Sunday evening Yonkey came to Mrs. Rump's house, on Buena Vista street, where she is employed as a domestic, and invited her to go to the Dime Museum, which invitation she accepted. She stayed out rather late, and, when she went to the place where she was employed, she could not get in, and Yonkey then told her that he would get a room for her, and took her to the Stevenson House, where he left her on the sidewalk while he went in and engaged the room. She then went upstairs with Yonkey, who, she says, affirst lay down on one of the beds without taking off his clothes, but afterward undressed, after she retired. The girl insists that she did nothing wrong, and says that Yonkey made no improper proposals to her. It is a very well to give the girl the benefit of the doubt. Bertha says that she was insulted by another man while she was insulted by another man while she was standing on the sidewalk in front of the Stevenson House, who offered her money to go home with him.

who offered her money togo home with him.

The Price of Stamped Envelopes.

E. B. Frye of 819 Grand avenue wrote to The Times, some time ago, complaining that he could not get as many 2-cent stamped envelopes for 25 cents at the Los Angeles Postoffice as he used to get back East. The question being propounded to Postmaster Preuss, he responds as follows:

"Stamps are sold at this office according to a schedule published and furnished by the Postoffice Department to each and every postoffice, the price being 22 cents for 10 2-cent stamped envelopes. The stampelerk informs me that she strictly adheres to the prices stated on the schedule, and thinks that the writer must be laboring under mistake."

Chinese Gambling.

Chinese Gambling.
It is stated positively as a fact that no tan
games have been running in Chinatown for
some months, but that the dice games have run, as have several of the lottery games, which were raided frequently by Detective Flickner while he was on duty in that section, and it was thought that they, too, had been effectually suppressed. This, it appears, seems not to have been the case. The game raided Sunday was a lottery game, as stated in the local columns of the various papers, the Herald included, but which the latter editorially stated was tan. Chief Benedict says that all classes and kinds of gambling must be stopped, and that all due diligence will be used to see that his orders are carried out. run, as have several of the lottery games

Improvements at Headquarters. Several improvements have been made at the City Prison since Chief Benedict took charge, and now the office for the booking of prisoners has been removed to the back part of the jail, and is so arranged Ward will be held this evening in the partition at Washington Gardena at 7:30 o'clock to select 24 delegates to be voted on at the primaries, which will be held on Thursday next.

VICE-PRESIDENT SMITH OF THE

ess that He Has His Eyes Turne Toward San Francisco, Though He Doesn't Say So—The Tide of Travel Hitherward.

Mr. Smith declares of looking over the simply for the purpose of looking over the roads, but from the mysterious manner of those on the inside it is believed that he is here in connection with the building of a liase to San Francisco. It is a well-known fact that the Santa Fé people have made up their minds to go there, and a prominent their minds to go there are the prominent of the purpose lize to San Francisco. It is a well-known fact that the Santa Fé people have made up their minds to go there, and a prominent official said a short time ago, "When we get ready to go there is no power that can keep us out," and it is believed that that time

ready to go there is no power that can accept us out," and it is believed that that time has come.

The people of the northern portion of the State have closely observed the progress of the Santa Fé in Southern California, and the stupidest of them can see that they have done much for this end of the State, and will do much more, and for that reason they are anxious to have them in San Francisco.

The northerners also know that the Santa Fé people never meddle in politics, and they have been so bamboozled and brow-beaten that they will give almost anything for a railroad company that will attend to its own business and build up the country.

Mr. Smith was also talked to on the 10 per cent, cut in salaries. The employés on this coast very justly claim that they cannot live or the same wages that are paid East, and that it will be impossible for them to live if the eastern cut is extended out here. Mr. Smith would not say what steps he will take in the matter, but the boys are of the opinion that he will stand by them, as he has always done in the past.

The rights travel from the East is begin-

NEW-COMERS.

The winter travel from the East is begin-

The winter travel from the East is beginning to loom up. Yesterday the Santa Fé's regular train dumped 194 people direct from the East into Los Angeles. At this rate the city will soon be filled up with visitors independent of excursions.

The Burlington people are waking up to the fact that west-bound excursions will pay. Up to the present time they have only run excursion trains out of California, but from now on they will run two excursion trains a week from the East. This will prove a big thing for Los Angeles.

Up to date the Raymonds have booked 300 more people than they had at this time last year.

Yesterday W. B. Scott of the Burlington route returned from Denver, where he took an excursion party a few days ago. Mr. Scott reports busin as booming in Denver.

RALLROAD PROGRESS IN CALIFORNIA.

In a late issue of the San Francisco Call the following information was given:

In a late issue of the San Francisco Call the following information was given:

"The railroad development of California is at last beginning to progress with vigor. Among the latest organizations for the purpose is the Stockton, Fresno and Southern company, which proposes to build a line from Stockton to Visalia, work to begin next year and to be prosecuted unceasingly to completion. The company is said to have secured at the East all the money required.

next year and to be prosecuted unceasingly to completion. The company is said to have secured at the East all the money required.

Comparing California with the older of the grain States, we notice a marked contrast in railroad mileage. California's area is, in round figures, three times that of Illinois, nearly four times that of Uhio and nearly five times that of Uhio and nearly five times that of Uhio and nearly five times that of Indiana. It is mearly as large as these three States put together, with New England added on, and yet Indiana has nearly twice as many miles of railroad as we have, Ohio has searly three times as many, Ill need hardly be observed that these States owe much of the progress they have made in the past quarter of a century to the extensive system of transportation they have enloyed.

California has been peculiarly situated. It had a few bits of road here and there when the greatest railroad enterrise of the '80s was started. That was such a vast scheme that it naturally absorbed all the lines which lay in its path.

The late land boom has had the effect of requiring additional railroads to open upnew territory. The Southern Pacific company realized the state of the case, and as early as 1886 planned or actually commenced the building of about 2000 miles of new road. The completion of the California and Oregon and the extension of the coast line to Templeton are parts of their new work. But these do not suffice, for all over the State independent companies are either actually grading or preparing to grade new transportation lines. One of these is the line mentioned above.

The old theory that a competing line was certain to divide business is not as firmly believed in as it was. Railroads create business for themselves. The new line from Stockton to Visalia will skirt the foothills at a distance of 10 to 15 miles from the main line of the Southern Pacific. But there is no reason to suppose that it will take any substantial portion of the latter's traffic or that it will run short of bus

JAY GOULD ON RATES. Mr. Jay Gould is quoted by the Stock-holder as saying that he believes the neces-sities of the situation will compel western oads to come to an understanding and ad oaus to come to an understanding and advance traffic rates. "If the present reck-lessness continues," he goes on to say, "a half dozen of the great banking houses here and in London, who soid to the public the securities of some of these warring roads, ought to issue a joint letter, warning the ought to issue a joint letter, warning the managers who are destroying the properties which they are employed to build up, that unless a change of policy is made at once they (the bankers) will ask the public to deposit its stock with them, with a view to a change of management, as was recently done by J. S. Morgan & Co. of London, in the case of St. Paul. That action on the part of London worked like a current of electricity in certain quarters, and a similar course should be directed, though on a larver scale, against other managements. Then those warlike officials would begin to fight for fair rates instead of big tonage only."

James Campbell, general manager of the proposed Los Angeles and Los Alamitos Bay Railroad, is in the city.

wan'ed blood, and she soon found it in her lodging-house. She and Bolinez met in the hallway, and after a little preliminary work with her tongue she lit into him in true Sullivan style. Before any of the roomers could interfere the Christ Theater artist had knocked the slanderer Jown and was making the little clots of blood fly in all directions. Bolinez was so thoroughly frightened that he could make no defense whatever, and had not some of the roomers pulled her off, the chances are that she would have put him to bed for several weeks.

McKinley for Speaker.

A leading eastern journal (not an Ohio paper) has the following strong and true words to say about Maj. Willand true words to say about Maj, William McKinley. He is worthy of them. The Republican party during the long years when it was an obscure minority developed in its struggle for supremacy a class of strong-brained men who finally made their ideas prevail at the North. These men carried the country safely through the war and the intricate problems of reconstruction. Most of them have now passed away, having built into the granile foundations of the Republic their great ideas and broad purposes. The Republican party today, with the overcrowding of our cities by foreign immigration, with labor problems of tremendous moment demanding solution, with the concentration of capital at the top of society and the menace of poverty at the bottom, with our best land about taken up, with European social conditions generally confronting us, with great questions of finance pressing us, the Republican party, in this stress of affairs, looks cheeffully to the future, for in its young leaders of the present we find a class of men by whose hands the helm will be guided aright.

Conspicuous among these is Maj. William McKinley of Orio, than whom there is no more representative Republican. He stands for its brains, its courage and its heart. Intellectually the peer of any man now in American public life, he is still a simple-minded, unaffected gentleman. A man of unflisching bravery and filled with the courage of his convictions, he is kind in his treatment of his political opponents. When the North was to send its fraterns words to the South, and withal to justify the North's faith in the idea of protection, he was called upon to meet an emergency in our national life only equaled by that which confronted Congress in 1801. The Speaker should be a man of brain, nerve and conscience, as well as one who will stand before the country as the embodiment of the ideas that have triumphed in the great battle just closed. We earnestly press the motod conditions of the ideas that have triumphed in the great battle just closed. We know of no o iam McKinley. He is worthy of them

Three Weak Brothers

The New York Herald, which supported Cleveland, has, since the elec tion, been talking very plainly about the causes of the Democratic defeat. While still praising the President's course in office, it declares that he has alienated public favor in several ways alienated public favor in several ways:
First—He retained in his Cabinet as his
Attorney General a man (Mr. Garland)
whom everybody saw to be no lawyer, and
who, besides this, was smirched with a most
malodorous speculation, which made him
unfit to hold any office.
Second—In like manner he persisted in
retaining Mr. Bayard, the most incompetent and the most unAmerican Secretary
of State this country has ever been cursed
with.

of State this section, with.

Third—He kept as his Secretary of the Interior far too long Mr. Lamar, a man not merely incompetent, but whose sympathies were so little with the people and so strongly with corporations and land strongly with corporations and land were so little with the people and sistrongly with corporations and land monopolies that it required a most extraor dinary public admonition from the President—such as no Cabinet officer ever received in any country—to hold him to his plainest duty in the land-reform question.

In his stubborn retention of these men in defiance of his party's, and of general public, opinion, Mr. Cleveland may find another cause of his defeat.

This is "sizing up" these Cabinet

carpenters with a degree of accuracy which is calculated to cause Truth to smile and curtesy gracefully. How could you expect a man born in Delaware, and capable of the immeasurable folly of writing a "statement" such as Bayard made to his master concerning the Sackville-West letter-how could you expect such a man to have the breadth between the eyes necessary for a real statesman? Delaware is a very small State; Bayard is a very small

A Los Angeles and Utah Railroad Company yesterday petitioned the City Council for a right of way through the city, from north to south, on the east side of the river, also the selling to them of some city land in the southern part of the city. In return the company offers to levee the river on the east side A great many schemes for a railroad to Salt Lake have been broached, during the past year, so that the public have become somewhat incredulous on the subject. If this company can satisfy the Council that it means immediat business, there will certainly be no disposition to throw unreasonable obsta cles in its way, as a direct line to Utah would be of very great service to this city, and would make possible the establishment here of smelters and reduction works for the entire southwestern mineral country.

THE third-party Prohibitionists did not succeed in their attempt to defeat the Republican party. In fact, their vote, as far as reported, is smaller, in most of the States, than in 1884. They must, however, be credited with tw smaller victories, which will doubtless in a measure, console them for Harrison's election. In New York they aided in the election of the saloon can didate, Gov. Hill, and in New Jersey they secured the election of a Demo cratic Legislature, whose first work will be the repeal of the local-option law. This ought to be glory enough for one campaign.

HERE is another straw which shows that the solid South has about played its part in the drama of American history. It is from the New York Herald:

"A solid South against a solid North. This is one solemn fact. While the Democrats carry New Jersey and Connecticut, the Republicans win West Virginla. New Jersey and Connecticut are only the political overflow of the metropolis, and we may as well accept it as the solid South against the solid North. And in this we note the one circumstance most to be regretted, something that our southern friends should think over seriously. That solid South delusion, that holding in an inextricable political embrace the dead and damned Confected eracy—truly, truly it is a miserable business, and now we see what becomes of it. If our southern friends, those who have sense enough to remember that some things have happened since 1805, would only set themselves to the abandonment of this foriorn fanaticism, it would be a national gain." its part in the drama of American his

There was quite a flutter among the soiled loves and the "macs" last night, when it was learned that the police were again of the warpath. Yesterday Officer Bosqu swore out complaints against Jim and Frank Powelson, Bob Short, Bobby Samp-son, and other high-flyers among the fraternity, and the warrants were given to Officers Lee and Cates for service. Short and Powelson were first brought in, and, after being relieved of their money and jewelry, they were locked up. While they were still in the "cooler." Theodore Lauer, of unsavory notoriety, came in to see his friends, very much under the influence of liquor. The officers, thinking there was a warrant out for him, and knowing that there ought to be if there was not, locked him up also, but when they discovered that his name was not on the list he was released. In the meantime Sampson had been brought in. He had been drinking some, and was as smiling and polite as a French dancing master. All of these worthies soon put up their \$100 ball, and they were released. It began to look as though Frank Powelson would have to spend the night in jall, when Lawyer A. B. Lockwood, in company with Short, came in with the money for his ball, when he also was released. Jim Powelson and the others had not been captured up to an early hour this morning, but as the officers are looking for them, they will be captured if they do not jump town. Warrants for others of the gang will be issued in a day two, which will be continued until the entire lot are disposed of ternity, and the warrants were given to Officers Lee and Cates for service. The assemblage was impelled partly by curiosity and partly from a desire to purchase something that once did service for the British Minister.

A large number of Washington's society beople and people who wanted "something English, you know," paid big prices for glassware and china. The auction was in the immense ballroom, and the china and glassware were exhibited on tables against the wall. Hundreds of people could not get near enough to see what was being sold, but there were plenty of buyers, who did not seem to care, especially, what they bought. Even where old china covers and dishes had been broken and lost, bids were quite active. Many people will show their regard for Lord Sackville by their collection of mementos.

GEN. SCHOFIELD'S REPORT.

Recommendations for Making the

Washington, Nov. 19.—By the Associated Press.] Maj.-Gen. Schofield, commanding the army, in his annual report says: "The past year has been one of peace among the Indians, formerly so troublesome, in the Division of the Pacific. The troops have been fully occupied in rifle practice and other duties simulating those of actual war. In the Division of the Missouri (with a single exception consisting of the suppression of disorder among the Crow Indians) the use of troops has been limited to the prevention of possible trouble with Indian tribes. The troops of the Division of the Atlantic have been fully and constantly occupied. The system of the practice of artillery with heavy sea-coast guns has been steadily developed, and is now adopted for the entire sea coast of the country. The zeal and efficiency displayed by officers and men, and the progress already made give grounds for confidence that the troops will be fully prepared to handle effectively weapons of modern construction and of large caliber as soon as such weapons can be made ready to be placed in their hands."

Gen. Schofield recommends that two regiments be added to the artillery without any material change in the number of officers, necessitating the addition of about 5000 to the number of enlisted men now allowed by law.

Referring to fortifications, Gen. Schofield says: "During the past 20 years the necessities of the service in the Indian country have caused the posts along the seaboard and northern lakes to be correspondingly neglected. Time and circumstances now seem beculiarly favorable to placing the sea coast and frontier of the country in a state of security."

Reference is made to the impairment of the efficiency of the army through the absence of officers from their regiments or corps. It is said that the service would be greatly benefited if such officers as are disabled could be retired and their places filled by young and active men.

There were 2436 desertions from the army during the past year, and the a

INDIANAPOLIS, Nov. 19.—[By the Associated Press.] The desire of the delegates to the general assembly of Knights of Labor to continue Powderly as their chief has been expressed to him tormally. The seven delegates who represent the Canadian assemblies called on him and asked him to accept the office once more. He gave then to understand that he would do so provide to understand that he would do so providing he could choose his own advisers on the General Executive Board. Everything indicates that he will be given his wish, and there is now only a difference of opinion regarding the way it shall be done. One plan is for him to choose eight names, four of which will be elected by the assembly. Another plan contemplates the nomination of four men. If any be rejected, new names shall be presented until the number is complete. Under any circumstance Powderly will undoubtedly continue in office, and will choose his own cabinet. Canada wants to be represented on the General Executive Board. The South has a like desire, and a movement is on foot looking to the selection of some representative business man.

It is reported that a proposition looking to the formation of an entirely new constitution has been made to the General Assembly, and is being considered by the proper committee. As there is a strong feeling in favor of a radical revision of the present constitution, there is little doubt that the ew constitution will have many supporters. supporters.

Last week George F. Detweiller, editor of a Chicago labor journal, returned home from Indianapolis, and wrote an editorial from Indianapolis, and wrote an editorial, which appeared on Saturday. It was an attack on the character and position of Powderly and of the General Assembly, stating that Powderly is the ruling mind of a convention packed in the interest of the general master workman, and that Powderly and Litchman were afraid of publicity, and therefore both of them were ready to make peace, and promptly did so at the first chance.

peace, and promptly did so at the first chance.

Powderly took the floor this afternoon, and made a vigorous denial and denunciation of the whole matter. His speech was pointed and emphatic, and was greeted with frequent and hearty applause.

A resolution was introduced and referred to a committee to the effect that whenever a member of the order shall have, through the public press, made accusations of misdemeanor against members and officials of the order, without having made and sustained these accusations before the proper court of the order, he lays himself open to immediate expulsion by the General Executive Board, without trial.

AN ORDER FROM ROME.

NEW YORK, Nov. 19.—The Catholic

News has received from its Rome correspondent the text of the reply sent by Cardinal Simeoni, prefect of the propaganda to His Eminence Cardinal Gibbons. It is

dinal Simeoni, prefect of the propaganda, to His Eminence Cardinal Gibbons. It it as follows:

"It is my duty to inform your Eminence that fresh documents relative to the association known as the Knights of Labor, forwarded to this sacred congregation, were examined by it at the sitting of the 16th of August of the current year. After having attentively studied the whole subject, the sacred congregation has directed me to reply that, so far as at present appears, the association of the Knights of Labor can for the moment be tolerated. The sacred congregation merely requires that the necessary modifications should be produced in the rules of the society to make clear whatever might seem obscure or might be interpreted in a bad sense. These modifications are required particularly in the passages of the preface to the rules concerning local associations, and then the words savoring of socialism and communism must be corrected in such a way that they shall only affirm the right conferred by God on man of acquiring property by using legitimate means and respecting the proportionate rights of all others."

PORT TOWNSEND (Wash.), Nov. 19.—
[By the Associated Press.] Fred E. Simpson, formerly of Fresno and Los Angeles, Cal., the young night agent at Tacoma who robbed the Northern Pacific Express Company of nearly \$13,000 and escaped to Canada last week, was returned here tonight in custody of General Manager Sullivan and Charles Dubois of Thiel's Detective Charles Dubois of Thiel's Detective Agency of Portland. Simpson had all of the coin packed in a valise when arrested at Kamloops, B. C., by the Dominion authorities, and was detained until the American detectives arrived, who convinced the young man that he would suffer less by returning to Tacoma and standing trial than being dealt with by British law for bringing stolen coin into the province. Simpson could not have been extradited for his crime, and it was by shrewd detective work that he was brought back.

Simpson had engaged an attorney at Kamloops, where he was arrested, who was hoodwinked by the American detectives, and before it was generally known Simpson was brought back to Vancouver and hurried aboard an American steamer, and before the Canadian officers knew what was going on the robber was brought here. He was taken to Tacoma tonight.

THE LICK ESTATE.

More Litigation Over the Million-aire's Generous Bequests, SAN FRANCISCO, Nov. 19.—[By the Asso-ciated Press.] The Lick trustees filed a complaint in the Superior Court today, in which the Lick beneficiaries are made de-fendants, and which aims solely to get a judicial construction of article 14 in James Lick's deed of trust, which provides for founding the California School for Mechancal Arts and endowing it with \$500,000. The complaint states that the trustees are ready to pay over the endowment money if the court shall decide that article 14 makes it their legal duty to do so. The article provides for the formation of a corporation with seven directors, which corporation shall acquire a site for the school and proceed to build. Since the formation of the corporation one of the directors, Lorenzo Sawyer, has resigned, and the vacancy has been filled by appointment. The complaint says there has never been a judicial decree releasing him from the trust, and asks if the proceeding is legal. judicial construction of article 14 in James

It is signed by prominent business men, irrespective of party. Mr. Sedden of the Slosa Furnace sold 2000 tons of pig iron a month ago to St. Louis parties for 25 cents a ton less than the present price if Cleveland was elected, and \$1 a ton more if Harrison was elected. The St. Louis purchasers stated that they believed iron would be worth \$1 a ton more under a Harrison administration. Mr. Sedden gets \$1 a ton advance on the 2000 tons. Mr. Hillman, manager of the Tennessee coal property, telegraphed the morning of Harrison's election to New York and bought 1000 shares of Tennessee coal stock at 32. It has now advanced to 36. The election of Harrison has boomed Birmingham. Mr. Thomas of Lehigh Valley will put extra furnaces here at once, and a gentleman is now looking in Murphy's Valley for the location of a furnace, which will be built immediately. In 1851 Birmingham had two furnaces. She now has 20, and the sites are selected for six more.

LONDON, Nov. 19.—[By Cable and Asso ciated Press.j In the House of Commons this evening, Madden, Solicitor-General of Ireland, in the absence of Balfour, who i ill, brought in the bill to further facilitate the purchase by tenants of land in Ireland by adding £5,000,000 to the amount applica-ble under the Ashbourne Act. He declared that the Ashbourne Act was a great suc-cess. There had been 14,338 signed agree-ments for the purchase of land, of which 8,632 had been completely carried out. Only two courses were open to the Govern-ment; one was to abandon the scheme of

Only two courses were open to the Government; one was to abandon the scheme of land purchase, and the other to extend the act. The fact that the act had been a conspicuous success justified the Government in seeking to enlarge its operations.

When Madden finished, Gladstone moved the following amendment to the Government's proposal: "That, in lieu of voting £5,000,000, it is expedient, in view of the lamentable sufferings arising from the recent evictions, to extend the land law of 1887 so as to empower courts to reduce or cancel arrears of rents found to be excessive." He complained that the Government had broken its pledge to the House, after obtaining command of the whole time at the disposal of the members under an engagement that no controversal measures should be introduced. Here was a bill of the first importance challenging discussion. It was submitted with a threat that it would be put forward daily until settled. His protest was equally against the mode of presenting the bill and the method in which the discussion was to be pressed. His amendment did not strike at the Ashbourne Act nor would it necessarily stop its operation. He objected to it because of the amount demanded. It was the manifest design of the the bill and the method in which the discussion was to be pressed. His amendment did not strike at the Ashbourne Act nor would it necessarily stop its operation. He objected to it because of the amount demanded. It was the manifest design of the Government to withdraw the subject of Irish land from the view of Parliament for several years. (Cheers.) That was not a course which could be allowed. The Opposition was not insensible to the value of land purchase. He did not desire to see landlords or any other class removed in a body. He wanted to see them not less, but a great deal more, Irish than they were, and to see them residents instead of absentees from Ireland. The principle of the previous land acts was totally different from the Ashbourne Act, under which £5,000,000 were obtained, apparently as a precedent for a further £5,000,000, thus drawing the House by slow degrees into a system from which there was no escape—putting land into the hands of the state, making the state the immediate landiord without proper guarantees. He (Gladstone) had always objected to the Ashbourne Act as giving such an initiative. It was certain that this bill would give the landlords a leverage to bring up rents which would enable only a handful of tenants to acquire holdings. Certainly it would assist the Government in its land purchase scheme, but under what madequate and precarious security for repayment for the advance. The Government is not justified in relying upon tenants to pay after the recent declarations of Lord Salisbury, that the majority of the 3,000,000 in Ireland were bent upon putting down the minority of 2,000,000, in order to get at and rifle their pockets. [Cheers, If the Government had the tenants weigher earnestly at heart, and if, instead of supporting the landlords, they meant to relieve the distressed tenants, they would deal with arrears instead of pressing a dangerous measure, which provided machiner for preventing a reduction of rent, and which afforded facilities for augmenting rents and multiplying e

incidents. Chancellor of the Exchequer, denied that the Government was pledged not to introduce controversal measures during the winter session. Gladstone's statement that if the Government had asked just sufficient to keep the act in operation until the next session it would have been granted, was incorrect. The immediate extension of the Ashbourne Act was a necessity. It was desired by the tenabts, The Government was prepared to deal with arrears in due course of time.

HENRY SCOTT JEFFERYS.

Did Not Go Up in a "Whiz." EAST LOS ANGELES, Nov. 19.-[To the Editor of THE TIMES.] You were misinformed about the Avery Gas Works. There was no removal of any one on account of these works yesterday or any other day. Nothing like a vuake took place there. There was no gas explosion there. The works did vuake took place there. There was no gas explosion there. The works did not go up in a "whiz," or any other way. The customers had their gas as usual last night. Only two persons in all East Los Angeles have complained of the works. A strong petition in favor of their remaining where they are, signed by all but four residents of the block where the works are located, is now before the Board of Health.

Truly, R. B. AVERY.

Wisconsin.
Colton, Nov. 16.—[To the Editor of
THE TIMES.] How did Wisconsin go in the late election? Which State ticket and what Congressmen were success

[The Republican electors and the Republican State ticket were elected; also, eight Republican Congressmen to one Democratic.—Ed.]

His Hands Were Full. Last night Jailer Russell received word from Deputy Sheriff Kerns of San Fernando to have an officer meet him at the depot, as he was coming down with nine prisoners. He got in on time, but, instead of nine, only brought in six men, three of them having made their escape. They were only tramps and "vags," and were the result of a general round-up in the San Fernando neighborhood. They will serve short sentences and be released, as is usual in such cases.

A LITTLE LECTURE TO MARRIED COUPLES.

ome Choice Recipes-Husband and Wife Growing Old Together-They Should Become as One Flesh-Drifting Apart.

I believe that there are thousands of husbands and wives who miss the great possibilities of happiness which exist with the marriage relation. There are many reasons for this, which, if once fully recognized, might be avoided. fully recognized, might be avoided. I have just come across a sensible article from the Baltimore Sun, which it would be well for both old and young married people to read. The truth of the article I have too often seen exemplified in the lives of people whom I have met. Says the writer:

"Husbands and wives who are fairly well mated generally grow to each!"

"Husbands and wives who are fairly well mated generally grow to each other's ways, so that in the course of time they live together peaceably and contentedly, one or the other or both yielding to the companion's whims, tastes or prejudices to avoid dissensions. During the process of this mutual accommodation and growth, which may extend over a long series of years, there is serious risk that it may be arrested by a decay of that affection which inspires it, or that in accomplishing the harmony the husband or wife may be obliged to yield more than plishing the harmony the husband or wife may be obliged to yield more than is fair, so that in the end the couple, nastead of being on terms of equality as husband and wife should be, stand in the relation of subject and master. "Newly-wedded couples seldom think the future as being anything different from the present when the sole thought of each is the pleasure of the other, when each is ready and even anxious

of each is the pleasure of the other, when each is ready and even anxious to make sacrifices at the shrine of love. They cannot forsee that, though the affection may be lasting, the modes of its manifestation accommodate themselves to changed relations, nor that the growth of a family, the increase of business duties and other natural changes in their environment will gradually alter their habits of life, and perhaps drift them apat from each other, unless each gives thoughful consideration to the duties of the married station. It is assumed that their love. station. It is assumed that their love-for each other continues; that though less fervid in its manifestations than during the honeymoon, it is really stronger, because more firmly rooted stronger, because more firmly rooted in respect and based on surer knowledge of character, than that which was first awakened by an evanescent charm of person or of manner, and yet, in spite of their greater and better love, the husband may become so careless and inconsiderate, so absorbed in business or his personal amusement, as to bring concealed grief to the heart of his faithful wife.

"Many husbands, unconscious of such neglect of duty, would be surprised if

neglect of duty, would be surprised if accused of it, and respond that they worked hard for their families, economized to lay up a fortune to care for them, supplied their wives with all that them, supplied their wives with all that they could reasonably ask for the support of the household, and generally conducted themselves as faithful husbands should do. Yet if they should give serious consideration to the subject they might find that they had neglected something of quite as much importance to the tired housewife as the means of living and provision for the future. Unconsciously, perhaps—so gradually that neither husband nor wife could note the steps whereby the means of living and provision for the future. Unconsciously, perhaps—so gradually that neither husband nor wife could note the steps whereby the change was reached—the husband began to shrink within himself, to carry home with him his business or other enterprises, and to withhold them more and more from his wife. Absorbed in and more from his wife. Absorbed in his own thoughts, he became uncomhis own thoughts, he became uncommunicative; his meals were eaten in silence; after tea he had accounts to look over or his daily paper to read, and the children must not disturb him.

"His wife,growing in his habits,grad-

ually abstained from disturbing the children were educated not to make unnecessary noise in his presence, to go to some other room for play or study, while the housewife, tired with study, while the housewife, tired with the performance of multifarious household duties, was obliged to seek needed rest before the husband could find leisure for anything more than the most necessary conversation of family affairs. In the meantime this silent household, whose wife longs for the old days of familiar converse and pleasant intercourse, is unconscious of any decrease in his affection; he feels, in fact, a stronger love for the patient wife who smoothes his way at the converse and pleasant intercourse, is unconscious of any decrease in his affection; he feels, in fact, a stronger love for the patient wife who smoothes his way at the converse and pleasant intercourse, is unconscious of any decrease in his affection; he feels, in fact, a stronger love for the patient wife who smoothes his way at the Congregation and Church. The ladies of the Presbyterian Church. The ladies of the Presbyterian Church. The ladies of the Presbyterian Church. The ladies of the Congregation are church. In the meantime this silent house hold, whose wife longs for the cold days of familiar converse and pleasant intercourse, is unconscious of any decrease in his affection; he feels, in fact, a stronger love for the old days of familiar converse and pleasant intercourse, is unconscious of any decrease in his affection; he feels, in fact, a stronger love for the old days of familiar converse and pleasant intercourse, is unconscious of any decrease in his affection; he feels, in fact, a stronger love for the old days of familiar converse and pleasant intercourse, is unconscious of any decrease in his affection; he feels, in fact, a stronger love for the old days of familiar converse and pleasant intercourse, is unconscious of any decrease in his affection; he feels, in fact, a stronger love for the old days of familiar converse and pleasant intercourse, is unconscious of any decrease in his affection; he feels, in fact, a stronger love for the old days of familiar converse and pleasant interchon will be served.

The ladies of t ou,s or which have been unable to appreciate at that Bernardino.

"But in spite of that love, in spite of his devotion to the material welfare of his wife and child, he has neglected to make her life pleasant; he has pursued his own path with little consideration for her desires, and has accepted her sacrifices as a matter of course. The blame is not always with the husband; blame is not always with the must to counter forces are always at work to counter forces are always at work to produce the same result. The wife, produce the same result to all while attending faithfully to all household duties, may have helped to make her husband a silent man by unnecessary discussions of his own affairs, and such 'small talk' as wearied him, and which he sought to avoid he here were the same to the sa sought to avoid by becoming absorbed in other things. Whatever the cause that leads to such drifting apart in the home lives of really faithful couples, the beginning of it should be noted and the area of the such that the suc and the remedy applied betimes, that as the years roll on husband and wife may grow together and become as one

There is no more beautiful sight than to see husband and wife as they grow old together, growing nearer to each other, their lives blending into

Yesterday's News Budget - A Run-away and a Fobbery.

PASADENA, Nov. 19.—[Correspond-ence of The Times.] The churches were very well attended yesterday. Rev. Dr. Dean, a former missionary to China, occupied the pulpit at the Baptist Church in the morning. Rev. Mr. Harris preached in the evening. Rev. M. N. Cornelius delivered two eloquent

sermons to large congregations. Rev. E. A. Healy delivered the sermon at the M. E. Church in the morning. Rev. Thomas Tibbett occupied the pulpit in the evening. Rev. Mr. Hill preached both merning and evening at the Congregational Church. The Methodists of Olivewood yesterday organized, and M. E. Church services at present will be held in the hall, but they expect to pull a church yery soon. build a church very soon. RUNAWAY.

Our good luck still continues—an-other runaway, but no one injured. The team attached to the wagon of the The team attached to the wagon of the Pasadena steam laundry became frightened and started from the laundry on Wilson avenue to Colorado street, down the latter street at a rapid pace until they reached the vacant lot next the Arcade building, where they ran into a buggy, upsetting it and the wagon also, which caused the runaways to come to a sudden halt, allowing their capture. The top of the buggy was knocked entirely off, while the laundry wagon will probably require a new wheel.

ROBBERY The house of Col. Picher, corner of Marengo avenue and California street, was broken into some time last week, was broken into some time last week, but, owing to the absence of the owner and family, who have not yet returned from Long Beach, the robbery did not come to light until yesterday. As most of the silverware had been stored until the family's return, the thieves did not reap a very rich, harvest, only finding a few knives, an old coat, and about \$20 in cash. The latter was in a child's bank. bank.

SYMPTOMS OF CATARRH.

SYMPTOMS OF CATARRH.

Very many persons have CATARRH in its earlier-stages, which scooner or later will undermine the general constitution, and lead to that most dreaded of all diseases, consumption, or perhaps merely destroy the hearing, who attribute the trouble to a cold and think it will scon pass off, but instead a fresh cold seems to be taken before one is entirely free seems to be taken before one is entirely free and the constant seems to be taken before one is entirely free and the constant seems to be taken before one is entirely free being watery, yellowish or greenish, and streaked with blood, or the nostria may be comparatively free and the discharge pass back, necessitating a hawking to clear the throat. The mucous may be difficult to raise or may be detached very ea-ily. Later on a dry cowgh, caused by tickling in the throat, which is very persistent, sets up, the patient may raise a little blood, and soon begins to lose flesh; may have slight chills and fever, some symptoms of indigestion are often neticed, and the appetite is capricious. A sense of wear ness is experienced upon as light exertion, and shockness of breath and quick beating of the heart is noticed upon ascending a flight of stairs.

If any of these symptoms are noticed, the friends should insist upon the patient, who seldom realizes his condition, consulting a physician, and having a thorough examination of the lungs made, so that the disease, if it exists can be arrested while there is yet time before the lungs are destroyed to any continue of the destroyed to any continue of the constitutional medication, is the only successful treatment in the large majority of these cases. We will cure every one of CATARRH of the NOSS and THROAT of one or forty years' standing, whether there is merely a stuffness in the hoose and a very offensive breath, and, if the lungs are affected, our treatment is the most rational and successful.

Au Explanation.

What is this "nervous trouble" wit. which so many seem now to be afflicted? It cou will remember a few years ago the word malaria was comparatively unknowr—today it is as common as any word in the English language, yet this word coversity the meaning of another word used by our forefathers in times past. So it is with nervous diseases, as they and malaria are intended to cover what our grandfathers andled billousness, and all are caused by troubles that arise from a diseased condition of the liver, which, in performing its functions, finding it cannot dispose of the bile through the ordinary channel, is compelled to pass it off through the system rausing nervous troubles, malaria, billour lever, etc. You who are suffering can well appreciate a cure. We recommend Green's August Flower. Its cures are marvelous.

The beautiful foothill suburb of Los Angeles at Cahuenga Pass is higher than the highest point in the city. This most lovely spot is situated six miles west of Los Angeles, in the frostless belt. It possesses the finest soil in the world—nothing equal to it elsewhere. It will grow successfully the most delicate flower or tender piant in midwinter, without irrigation: in fact, we never irrigate this foothill land. It does not require it. It is a very healthy location. No mainria, but little fog, pure, unmolested—ocean breeze every day in the year. Pure, soft water. Therefore no more bealthy location can be found anywhere. Fine view of ocean, vessels, city, valley and mountain. We defy competicity valley and mountain. found anywhere. Fine view of ocean, vessels, city, valley and mountain. We defy competition in all of the advantages that go to make A DESIRABLE SPOT FOR A HOME! It cannot be beat. Yes, it cannot be equaled I know this is saying a great deal. I am willing to stake my reputation on what I say. I am residing at Hollywood, and intend to make it my permanent home. A number of fine buildings are new being built at this point. Water is being piped. Cement sidewalks are being put down. The Cabuenga Valley Railroad is finished to this place, and six trains each way are now running on this road. See time table. This railroad is running in connection with Second-street cable. Half-fare tickets will be sold to persons residing at Hollywood, thus affording splendid connection with the city. The Los Angeles County Railroad will soon be completed and running to this place.

HOLLYWOOD HOLLYWOOD

Is now for the first time offered for sale, at low prices and easy terms, in quantities to suit purchasers. Special inducements will be offered to persons making valuable improvements, until a certain number of fine houses are secured. After that is done, then land and lots at this point will be held firm for what they are really worth There is from 6 to 7 acres in a block, and nearly a half acre in a lot. Ask any old citizen of Los Angeles about this location, and then call on me at Hollywood, or WILCOX & SHAW, 24 N. Inquest on the Dead Street-car Con-

An inquest was held last evening at 7 o'clock on the body of John E. Van Ranthe street-car conductor who died suddenly Sunday afternoon at 5 o'clock, a full account of which was published in THE TIMES yesterday morning. After the examination of several witnesses, the jury returned a verdict of death from natural causes. Before the inquest, a post mortem was made by Dr. D. G. MacGowan, which showed that death was caused from heart blood being found in that organ.

Yesterday afternoon Orr & Sutch received a telegram from the young man's parents, who reside at Hudson, N. Y., tellparents, who reside at Hudson, N. MEYER, LEWIS & CO.

We are constantly receiving new attractions from Miliard, Haskell & Co. that are world beaters.

Lad ea' curacoa kid button shoes, \$1.25; worth \$2.50. This isn't any sun-dried cashmere kid, as some of our "misfit apologies" for shoe stores are wont to advertise.

Ladies' glove kid button shoes, \$1.25; and they are not "sun dried" either, but worth \$2.75 every day in the week.

Men's working lace shoes, \$1.25, and no equal them at double the price.

Misses' grain tip button school shoe, spring heels 90c; and there isn't a store in the town that can touch them with a 40-foot pole.

Infants' ankle ties 25c; real beauties.

Lad es' oxford lace shoes, \$0c; and who can equal the goods for the money?

It isn't necessary for us to fill the papers full of price lists. Our whole store is running over with delicious bargains. We haven't got to move; we are not trying to close out; we are not advertising shoes as new goods that are nearly old enough to vote, but the bargains we are giving the public are all fresh, solid articles—all wool and a yard wide. It makes the blowhards and double-dealers in the shoe business squirm and squeal at the prices we publish, but we are going right along, doing the biggest business in the town benefit of the public and our own satisfaction.

A Statement from Miss Joreback.
An attack was unjustly made on me by the
Express on the 2d inst., parading my name
before the public in an article filled with
falsebood, and when I wrote out a modest and
ladylike correction and asked him to publish
it, he insulted me in rude languase and would
not allow me an opportunity to defend my
good name against the charges. Since the
suit was maliclously brought against me and
I was honorably acquitted, he again parades A Statement from Miss Jereback. I was honorably acquitted, he again parades my name in large letters, and in an article filled with falsehoods endeavors to slur me. I do not reside next to Mr. Platt on Grand avenue, but I reside on Bunker Hill avenu possess more property and perhaps pay mo taxes in this city than all the parties who se to persecute me, including the Express.
